

## All-In-One Portable Metal Cutting Torch System

No more long, unwieldy torch lines snaking behind you! Our portable system puts your torch right where you need it!

*Portable, lightweight, compact design*

*Uses MagneGas2<sup>®</sup>, cuts 40% faster than other oxy-fuels like acetylene*

*Perfect for emergency responders and bucket lift applications*

*Up to 90 minutes of metal cutting*

*Customizable in various colors to match your company or department's equipment*

The MagneTote is a fully portable, all-in-one metal cutting torch system. Its lightweight, portable design puts your torch right where you need it, and eliminates the need for long, unwieldy and unsafe torch hoses. Everything needed to perform the cutting task is right at your fingertips. For emergency responders, this can substantially decrease the amount of time needed to setup, time that could be critical to saving a life. For construction or bucket lift applications, the MagneTote portable unit can save time and increase safety, both of which translate to cost savings on the job.

Using MagneGas2, a revolutionary cutting fuel made from renewables, increases the speed of the cuts and its effective heat zone is maximized and pinpointed. It can cut up to four times farther away from metal than conventional torch sets.

#### Standard Configuration\*

- (1) aluminum exo-skeleton tote, powdercoated in Safety Red
- (1) 33 cuft MagneGas2 cylinder (high grade spun aluminum)
- (1) 33 cuft Oxygen cylinder (high grade spun aluminum)\*\*
- (1) gaugeless Harris high quality MagneGas2 regulator, preset
- (1) gaugeless Harris high quality Oxygen regulator, preset
- (1) pair quick connect fittings
- (1) 17" Injection Mix Torch (Harris high quality)
- (3) torch tips (sizes 2, 4, 6)
- (1) 12.5' or 25' twin t-hose

*\*Hose length, torch tips and powdercoat colors can all be customized for your individual application*

*\*\*Additional 33 cuft Oxygen cylinder can be purchased with kit, extends cutting time from 45 to 90 minutes*

DIMENSIONS: H=24.0", W=17.25", D=13.0"  
WEIGHT: approximately 70 lbs
